

Ophirae is a project elaborated for more than one decade by competent musicians from the brazilian underground elite who prefer to keep their identities obscure, adding mystery to a melodic and extremely competent ambience, which refers to the best works of bands like Carcass, Dissection, Dawn and Uada.

After the success of the singles / music videos "pride" and "sloth", the band released the album "ophidian" in 2022, later released the third video clip "crawl" and went on a mini tour of the northeast, with some dates alongside the Americans do toxic holocaust.

The album "ophidian" was produced in the band's own studio and features the special participation of Astaroth (besatt), Luiz Louzada (vulcano) and Paolo Bruno (thy light) and has been very well received by the specialized press, placing Ophirae as one of the great highlights of the brazilian extreme metal scene.

A release made in partnership between Mutilation Records and the Black Metal Store, in a premium digipack version.

Staff:

P: Vocal and Bass / L: Guitar / F: Drums

Ophirae: Production, mixing and mastering

Bruno Delgado: cover oil hand painting

Marcos Cerutti: Layout
